MAXIMIZE ROI WITH BEYONDTRUST UNIVERSITY TRAINING

BeyondTrust University training services are designed to maximize your investment in BeyondTrust technologies by educating your users on best practices for configuring and using our products. Superior training is part of our commitment to help you obtain the maximum benefit possible from the entire BeyondTrust solution. Our training options will give your organization the foundational knowledge needed to administer, configure, and utilize BeyondTrust for optimum performance. You can select from a variety of modular training courses to ensure your team receives relevant education.

BEYONDTRUST TRAINING FOR SECURITY PROFESSIONALS

The *AD Bridge* course is designed for the security professional tasked with installation, administering, monitoring and reporting on AD Bridge. Students learn how to install the product's components, connect a Unix host to Active Directory, create and configure Group Policy Objects, and configure Active Directory users for Unix/Linux logon via console, SSH and Putty.

FLEXIBLE TRAINING OPTIONS: ON-SITE, VIRTUAL OR ELEARNING

This course is available as a virtual instructor-led course or on-site at your location. The course length is two days on-site, or 15 hours over 3 days virtually. The course is led by a BeyondTrust certified instructor.

The course is also available as a self-paced eLearning.

KEY LEARNING OBJECTIVES

- **Initial Configuration** – learn about the logging and management tools of the AD Bridge and how to configure them properly.
- **Authentication** – covers authentication techniques via the AD Bridge as well as troubleshooting tips.
- **Advanced Topics** – use cells and schemas to maximize the proper management of your users with AD Bridge.

UNIT 1
Introduction

- Product Overview
- The Classroom Lab Environment

UNIT 2
Installation and Configuration

- LESSON 1: AD Bridge Logging Configuration
- LESSON 2: Installing Management Tools
- LESSON 3: Configuring AD Bridge
- LESSON 4: Installing Agents

UNIT 3
Authentication and Group Policy

- LESSON 1: Install Agents
- LESSON 2: Authenticate Logins
- LESSON 3: Manage Unix Settings with GPO
- LESSON 4: Identify Group and Policy Inheritance

UNIT 4
Advanced Concepts

- LESSON 1: Advanced AD Concepts and Management
- LESSON 2: Integrating with Core AD Technologies
- LESSON 3: Choosing a Cell Design
- LESSON 4: Advanced Agent Configuration
- LESSON 5: Troubleshooting Logins

ABOUT BEYONDTRUST

Bomgar is the worldwide leader in Privileged Access Management, offering the most seamless approach to preventing privilege-related breaches. Our extensible platform empowers organizations to easily scale privilege security as threats evolve across endpoint, server, cloud, DevOps, and network device environments. BeyondTrust gives organizations the visibility and control they need to reduce risk, achieve compliance objectives, and boost operational performance. We are trusted by 20,000 customers and a global partner network. Learn more at www.beyondtrust.com.
