

# PASSWORD SAFE

BeyondTrust Professional Services deliver best practices and a cost-effective path to a successful Password Safe (PS) implementation. Professional Services security engineers will partner with customers on installation, configuration, and knowledge transfer. Our services are available in tiered packages to meet your architectural and business requirements.

## Professional Services Packages – Which Is Right for Me?

Selecting the right professional services package helps to ensure a positive business outcome. Our packages are designed to fit your preferred deployment technology and project scope. We'll help you determine which tier will work best for you.

	Tier 1	Tier 2	Tier 3	Tier 4
<b>Professional Services Criteria</b>				
BeyondTrust UVM Appliance deployment	●	●	●	●
Configure Active / Passive High Availability (appliance only)	●	●	●	●
BeyondTrust software deployment (including hardening)		●	●	●
Configure Active / Active High Availability (appliance only)			●	●
Configure Active / Active High Availability (software only)				●
Remote Worker Nodes (software or appliances)				●
<b>Professional Services Tasks</b>				
Integration with Active Directory (AD) or LDAP	●	●	●	●
Create assets based on data import, manual creation or discovery	●	●	●	●
