PowerBroker Privileged Access Management Platform

Reduce Privilege Threats with Visibility and Control

BeyondTrust®
VISIBILITY. KNOWLEDGE. ACTION.

Unified Privileged Access Management Solutions that Reduce Insider Threats with Visibility and Control

Controlling and monitoring privileged access is extremely important to mitigating the risks posed by insider threats, preventing data breaches, and meeting compliance requirements. But security and IT leaders have to walk a fine line between protecting the organization's critical data to ensure business continuity, and enabling users and administrators to be productive.

Why? Disparate, disjointed tools deployed and managed in silos leave gaps in coverage over privileged access. This legacy model is expensive, difficult to manage, and requires too much time to show any meaningful risk reduction.

The PowerBroker Privileged Access Management Platform

The BeyondTrust PowerBroker Privileged Access Management Platform is an integrated solution that provides control and visibility over all privileged accounts and users. By uniting capabilities that many alternative providers offer as disjointed tools, the PowerBroker platform simplifies deployments, reduces costs, improves system security and reduces privilege risks.

> "The addition of the PowerBroker Platform was an unexpected benefit that has allowed to deliver easy-to-use dashboards and reports to the rest of the organization, eliminating monthly presentations and manual reports."
>

Key Solutions

ENTERPRISE PASSWORD SECURITY

Discover, manage and monitor all privileged accounts and SSH keys, secure privileged assets, and report on all privileged account activity in a single solution.

**ENDPOINT LEAST PRIVILEGE**

Enforce least privilege across all Windows and Mac endpoints, gain visibility into target system vulnerabilities, and control access to privileged applications without disrupting user productivity or compromising security.

SERVER PRIVILEGE MANAGEMENT

Gain control and visibility over Unix, Linux and Windows server user activity without sharing the root or administrator account.

A SINGLE PLATFORM FOR MANAGEMENT, POLICY, REPORTING AND THREAT ANALYTICS

Utilize a single solution to manage PAM policies and deployment, understand vulnerability and threat analytics, and provide reporting to multiple stakeholders and complementary security systems.

THE POWERBROKER PRIVILEGED ACCESS MANAGEMENT PLATFORM

Enterprise Password Security
Provide accountability and control over privileged credentials and sessions
APPS | DATABASES | DEVICES
SSH KEYS | CLOUD | VIRTUAL

Endpoint Privilege Management
Remove excessive user privileges and control applications on endpoints
WINDOWS | MAC

Server & Infrastructure Privilege Management
Control, audit and simplify access to DevOps and business-critical systems
UNIX | LINUX
WINDOWS | NETWORK DEVICES

POLICY & ACTION RESPONSE

The BeyondTrust PowerBroker Privileged Access Management Platform provides visibility and control over all privileged users and accounts in your organization.

BeyondTrust Privileged Access Management Solutions

ACHIEVE INTEGRATED, END-TO-END PRIVILEGED ACCESS MANAGEMENT

PowerBroker delivers the complete spectrum of privileged access management solutions. From establishing and enforcing least privilege on endpoints and servers, to securing enterprise credentials, BeyondTrust unifies best-of-breed capabilities into a single, integrated platform that acts as a central policy manager and primary reporting interface.

GAIN VISIBILITY INTO PRIVILEGED SYSTEM AND ASSET SECURITY

Leveraging vulnerability data from BeyondTrust's Retina and other solutions provides a complete picture of privileged system and asset security – including for network, cloud and virtual assets. This zero-gap coverage reduces risk by ensuring that no assets are left unprotected.

UNDERSTAND PASSWORD, USER AND ACCOUNT BEHAVIOR

Analyze privileged password, user and account behavior, and assign event Threat Levels based on the user, asset, and application launched. This makes it easier to uncover emerging risks, pinpoint and report on at-risk systems, and take action to proactively eliminate the threat before potential damaging effects of a breach.

ALIGN WITH IAM SOLUTIONS

Integrate with leading identity governance solutions, enabling automated provisioning, entitlements cataloging, and access certification for privileged accounts and administrator access. This capability increases visibility into user, application and asset interaction with behavioral analytics to track potential malicious activity from insider and external threats.

ANALYST RECOGNITION

Don't just take our word for it. BeyondTrust has been recognized for its patented approach to solving privileged access management challenges has been recognized by industry experts as well.

- **Gartner:** BeyondTrust is a listed as a representative vendor in the Gartner Market Guide for Privileged Access Management.[1]

- **Ovum:** "Deploying the BeyondTrust platform … provides an integrated, one-stop approach to PAM … one of only a small band of PAM providers offering end-to-end coverage."[2]

- **TechNavio:** "BeyondTrust is a pure-player in Global Privileged Identity Management market and holds a significant position in the market."[3]

- **Frost & Sullivan:** "Frost & Sullivan endorses PowerBroker Password Safe."[4]

- **Forrester:** "BeyondTrust is a Leader." "BeyondTrust excels with its privileged session management capabilities." [5]

- **IDC:** BeyondTrust is a "Major Player" in Privileged Access Management.[6]

- **Kuppinger Cole:** "BeyondTrust is a vendor you can rely on."[7]

- **451 Research:** "BeyondTrust is one of the elder statesmen of the industry."[8]

- **Network World:** "PowerBroker Unix & Linux product takes PIM over to Linux and Unix systems, where it's sorely needed."[9]

- **SC Magazine:** "For its traditional BeyondTrust quality and complete integration into the BeyondTrust platform, we make this our Recommended product."[10]
