Having certified integrations for forwarding critical events to third-party security solutions marks a critical step in escalating user and asset security in much the same way network management and automated help desk solutions perform these functions in a traditional IT infrastructure. Adding real-time privileged session activity and vulnerability intelligence to a security information and event management (SIEM) solution arms organizations with superior targeted attack and breach detection, as well as broader compliance visibility for insider and external threats.

**Security Information and Event Management Integration**

LogRhythm® and BeyondTrust® have developed an integrated solution for enterprise security analytics and threat management. LogRhythm automatically incorporates privileged access management and vulnerability data from BeyondTrust’s PowerBroker® and Retina CS to deliver real-time cyber threat protection based on up-to-date situational awareness and comprehensive security intelligence.

The result? Holistic visibility into asset and user risk, coupled with real-time threat detection and response.

**Solution Benefits**

- **Real-time correlation** of exposed vulnerabilities, including missing patches and configuration weaknesses, across the entire IT environment for enterprise threat intelligence.
- **Increased visibility and enhanced breach detection** capabilities through the integration of network security data with multi-dimensional behavioral analysis.
- **Accurate threat detection** by linking meaningful events with conditional logic and current threat analytics to reduce the number of false positives and false negatives.

**LogRhythm: Real-Time Visibility into Activity on Systems, Networks, Databases, and Applications**

LogRhythm's security intelligence and analytics platform enables organizations to detect, prioritize and neutralize cyber threats that penetrate the perimeter or originate from within.
The PowerBroker Privileged Access Management Platform

The BeyondTrust PowerBroker Privileged Access Management Platform, which delivers visibility and control over all privileged accounts, users, and assets. The platform integrates a comprehensive set of PAM capabilities to simplify deployments, reduce costs, improve system security, and reduce privilege-related risks. PowerBroker solutions include:

- **Enterprise Password Security**: Provide accountability and control over privileged credentials and sessions.
- **Server Privilege Management**: Control, audit, and simplify access to business-critical systems.
- **Endpoint Least Privilege**: Remove excessive user privileges and control applications on endpoints.

**BeyondTrust: Visibility and Control over User & Asset Risk**

Controlling and monitoring privileged access is extremely important to mitigating the risks posed by insider threats, preventing data breaches, and meeting compliance requirements. But security and IT leaders have to walk a fine line between protecting the organization’s critical data to ensure business continuity, and enabling users and administrators to be productive.

Why? Disparate, disjointed tools deployed and managed in silos leaving gaps in coverage over privileged access. This legacy model is expensive, difficult to manage, and requires too much time to show any meaningful risk reduction.

BeyondTrust is a global cyber security company dedicated to proactively eliminating data breaches from insider privilege abuse and external hacking attacks. Corporate and government organizations rely on BeyondTrust solutions to shrink attack surfaces and identify imminent threats.

Our integrated risk intelligence platform presents a unique competitive advantage in its ability to reveal critical risks hidden within volumes of user and system data. This unifies IT and security departments, empowering them with the information and control they need to jointly prevent breaches, maintain compliance, and ensure business continuity. BeyondTrust’s privileged access management and vulnerability management solutions are trusted by over 4,000 customers worldwide, including over half of the Fortune 100.
